

# MASSARELLI'S®

MAKERS OF FINE STONE GARDEN ACCENTS

## SET UP INSTRUCTIONS

### 3448 48" MERMAID and FISH FOUNTAIN

Open the bag containing the pump kit **P7501**. In the kit you will find:

1 - 40075 (75 gallons per hour pump)	1 - 3/8" plastic tee
1 - 2" long piece of 3/8" clear tubing	1 - rubber stopper
1 - 12" long piece of 3/8" kink free tubing	1 - hose clamp

1. Find the 3/8" plastic tee and the 3/8" clear tubing 2" long. On the middle connection of the 3/8" plastic tee slip on the piece of 3/8" clear tubing 2" long. Find the piece of 3/8" kink free tubing 12" long and cut two pieces 6" long. Attach one piece on each end connection of the 3/8" plastic tee. This will be the **tubing assembly** that will run the fountain.
2. Place the one piece shell and pedestal on a firm and level area where fountain will remain.
3. Find the pump, the hose clamp, rubber stopper and the tubing assembly. Attach the middle connection of the 3/8" plastic tee on the tubing assembly to the pump with the hose clamp. Place the pump into the pump house located in the center of the shell and run the plug end of the electrical cord down the PVC pipe located in the pump house. Retrieve cord from under pedestal and place in groove in bottom of pedestal. Slip the rubber stopper onto the power cord with the small end facing away from the pump. Insert the rubber stopper snugly into the PVC pipe. Make sure the pump is seated on the bottom of the pump house. Adjust position of the rubber stopper on the power cord if necessary.
4. Find the statue. On a padded surface place the statue on its back exposing the two copper pipes located in the bottom. Clean any excess concrete and/or tape from the two copper pipes located in the bottom of the statue. Attach the two pieces of 3/8" kink free tubing to the two copper pipes in the bottom of the statue. Position the statue on fountain.
5. Fill shell with water and plug the pump into a 110VAC GFCI protected outlet. Adjust the flow of water to the statue by adjusting the dial type flow control located on the front of the pump.
