MAKERS OF FINE STONE GARDEN ACCENTS

## SET UP INSTRUCTIONS

### 3493 58" ONE TIER DISTRESSED SCROLL FOUNTAIN

Open bag containing the pump kit **P29002**. In the kit you will find:

1 – KING 400 (400 gallon per hour pump)	1 - rubber stopper
1 - 8" long piece of 1/2" kink free tubing	

1. Place pedestal on a firm level surface where fountain will remain. Place the shell on the pedestal.
2. Find the piece of 1/2" kink free tubing 8" long. Cut one piece 2 1/2" long. Find the pump and attach the remainder of the 1/2" kink free tubing to the outlet side of the pump with the hose clamp.
3. Place pump and tubing assembly into the pump house located in center of the shell and run the plug end of the electrical cord down the PVC pipe located in the pump house and down thru the pedestal. Retrieve cord from under pedestal and place in groove in bottom of pedestal. Slip the rubber stopper onto the power cord with the smaller end facing away from the pump. Insert the rubber stopper snugly into the PVC pipe. Make sure the pump is seated on the bottom of the pump house. Adjust position of the rubber stopper on the power cord if necessary.
4. Position the shell on pedestal and level. To level shell, place level on top rim of the pump house in the center of shell. Level in (2) Two directions left to right and front to back. **Shim as needed.**
5. Find the urn. On a padded surface lay the urn on its side. On the bottom of the urn you will see a copper pipe. Clean any excess concrete or tape from this copper pipe. Place a piece of padding on the pump house. Place the lion finial or urn on the pump house. Have one person tilt and hold the urn and another person connects the 1/2" kink free tubing to the copper connection located in the bottom of the urn. Remove padding. Position the urn on the pump house. Find the piece of 1/2" kink free tubing 2 1/2" long and slip it onto the 1/2" copper tubing located inside the top of the lion finial or urn about 1".
6. Fill shell and the urn with water and plug the pump into a 110VAC GFCI protected outlet.

### 3569 CONTEMPORARY LION URN FOUNTAIN

### 3599 30" PETAL POOL FOUNTAIN

1. Place the pool on a firm level surface where fountain will remain. Place a brick under one side of pool. This will help you retrieve the power cord from under the pool.
2. Find the pump and the piece of 1/2" kink free tubing 8" long. Attach the 1/2" kink free tubing to the outlet side of the pump. Place pump and tubing assembly into the pump house located in center of the pool and run the plug end of the electrical cord down the PVC pipe located in the pump house. Retrieve the cord and place in groove in bottom of pool. Slip the rubber stopper onto the power cord with the smaller end facing away from the pump. Insert the rubber stopper snugly into the PVC pipe. Make sure the pump is seated on the bottom of the pump house. Adjust position of the rubber stopper on the power cord if necessary. Remove brick from under pool and level.
3. To level pool, place level on top rim of the pump house in the center of pool. Level in (2) Two directions left to right and front to back. **Shim as needed.**
4. Find the urn. On a padded surface lay the urn on its side. On the bottom of the urn you will see a copper pipe. Clean any excess concrete or tape from this copper pipe. Place a piece of padding on the pump house. Place the urn on the pump house. Have one person tilt and hold the lion urn and another person connects the 1/2" kink free tubing to the copper connection located in the bottom of the lion urn. Remove padding. Position the urn on the pump house.
5. Fill the pool and the urn with water and plug the pump into a 110VAC GFCI protected outlet.
