MAKERS OF FINE STONE GARDEN ACCENTS

SET UP INSTRUCTIONS

3656 40" TORUSSO ARCH WALL FOUNTAIN (YOU WILL NEED HELP WITH THIS FOUNTAIN)

Open the bag containing the pump kit **P22504**. In the kit you will find:

- | | |
|----------------------------------------|------------------------|
| 1 - 40225 (225 gallon per hour pump) | 2 - black plastic shim |
| 1 - 5" long piece of 3/4" clear tubing | 1 - 3/4" plastic ell |

1. Find the piece of 3/4" clear tubing 5" long and cut 2 pieces 2 1/2" long. Find the 3/4" plastic ell and attach a piece of 3/4" clear tubing 2 1/2" long on each end. This will be the tubing assembly.
2. Place the fountain pool section on a firm and level area where the fountain will remain. Place the pump in the center of the fountain pool. Place the power cord in the groove over the rear wall of the fountain pool. **Carefully**, on a piece of padding, lay the fountain wall piece on its back. On the bottom you will see a PVC pipe clean any excess concrete or tape from this pipe. Connect one end of the tubing assembly to the PVC pipe. The opposite end of the tubing assembly will face up.
3. Have two people **Carefully** lift and place the fountain wall piece onto the rear of the fountain pool section. Carefully lower the fountain wall piece into the two locks located on both sides of the fountain pool section.
4. *Connect the pump to the opposite end of the tubing assembly. The pump will be lying on its side.*
5. Retrieve the power cord from behind the fountain. Find the two black plastic shims. Insert one shim on the right side and one on the left side behind the fountain wall piece between the fountain wall piece and the fountain pool.
6. Find the pump cover and place it over the pump. Find the drain plug and insert snugly into the drain insert located in the pool section of the fountain. Fill the pool with tap water and plug the pump into a 110VAC GFCI protected outlet. To adjust the water flow use the dial type flow control located on the front of the pump until the desired result is achieved.
