

## SET UP INSTRUCTIONS

### 3704 40" CENTO URN ON 6' POOL FOUNTAIN

Open bag containing the pump kit **P70002**. In the kit you will find:

1 - 02527 (700 gallon per hour pump)	1 - tube of silicone	
1 - 46" long piece of 3/4" PVC pipe with threaded coupling end	1 - rubber stopper	1 - putty tape

1. Prepare a level base of 4" poured concrete or 6" compacted crushed limestone. The 6' fountain pool has an outside base diameter of 77".
2. In the center of the 6' fountain pool you will see a PVC insert. Find the pump and run the plug end of the power cord down the PVC insert. Leave three feet of slack on the power cord from the pump to the PVC insert. Retrieve the power cord from under the pool and place the power cord in the groove in the bottom of pool. Find the rubber stopper and slip it onto the power cord, with the smaller end facing away, three feet from the pump. Find the tube of silicone and apply around the outside edge of the rubber stopper and around the power cord. Insert the rubber stopper snugly into the PVC insert.
3. Place the 6' fountain pool in the center of the area where the fountain is to be displayed.
4. Find the pumphouse and position it in the center of the 6' fountain pool and level. To level, place level on top rim of the pumphouse. Level in (2) Two directions left to right and front to back. **Shim as needed.**
5. Place a piece of padding on top of the pumphouse so you won't scratch it. Find the 40" cento urn. Remove any tape or excess concrete from both ends of the PVC pipe located in center cavity of the urn. Position the urn on top of the pumphouse and level. To level, place level on top rim of the 40" cento urn. Level in (2) Two directions left to right and front to back. **Shim as needed.**
6. Find the piece of 3/4" PVC pipe. Insert the female threaded end of the 3/4" PVC pipe down into the PVC pipe that is in the center cavity of the urn until it touches the floor of the fountain pool. Move the pump into the pumphouse and **carefully** line up the threaded outlet of the pump with the threaded end of the 3/4" PVC pipe. **Carefully** screw the 3/4" PVC pipe onto the threaded outlet of the pump **hand tight**.
7. Find the piece of putty tape. Remove the backing from the putty tape. Apply the putty tape around the 3/4" PVC pipe and down into the PVC pipe in the center cavity of the urn where it passes through. Keep the 3/4" PVC pipe in the center of the PVC pipe while you apply the putty tape all the way around. **You want to create watertight seal so use all of the putty tape.**
8. Find the drain plug and insert snugly into the drain insert located in the fountain pool. Remove any tape and or dirt from the drain insert before you insert the drain plugs.
9. Fill the urn and the 6' fountain pool with water. Plug the pump into a 110VAC GFCI protected outlet.
