

MASSARELLI'S®
MAKERS OF FINE STONE GARDEN ACCENTS

3894 - Fountainette - Tiki

Fountain Information

- This fountain holds approximately 1 gallon of water.
- Two people are recommended for the installation of this fountain.
- A small fountain cover can be purchased separately for winterization.

Fountain Components

- #3894P - One Piece Pedestal & Shell
- #3894T - Finial

Pump Kit 99011 Includes

- 1 - 40075 - 75 GPH Pump
- 1 - 9920 - Yellow LED Light
- 1 - 9961 - 8" Piece of 1/2" Clear Tubing
- 1 - 9941 - 2 Hole Rubber Stopper

Tools Required

- Bubble Level
- Marker or Pen
- Tubing Cutter or Scissors

Set Up Instructions

1. Place the one piece pedestal and shell on a firm and level area where the fountainette will be installed.
2. Find the pump and LED light and unravel the cords.
3. Feed the LED light cord through the center of the one piece pedestal and shell by leaning it on it's side. Leave 12" of cord slack inside the shell portion of the pedestal.
4. Feed the pump cord through the center of the one piece pedestal and shell by leaning it on it's side. As you stand it back upright, pull both cords through the groove located at the bottom of the one piece pedestal and shell.
5. Find the 2 Hole Rubber Stopper and insert the cords by spreading the slits open. The LED light cord goes through smaller slit and the the pump cord goes through the larger slit.
6. Push the 2 Hole Rubber Stopper into the PVC pipe located in the center of the one piece pedestal and shell until it is flush.
7. Find the tubing and attach it to the outlet side of the pump by slipping it on to the pump fitting.
8. Find the finial and slide it over the tubing until the tubing is sticking out of the top. Place the finial carefully on to the shell portion of the one piece pedestal and shell.
9. Mark the tubing where it is even with the finial. Trim the the tubing a 1/2" shorter from your mark.
10. Remove the finial and insert the LED light on the end of the tubing that you just cut.
11. Slide the finial back onto the tubing and carefully place it on to the shell portion of the one piece pedestal and shell.
12. Fill the one piece pedestal and shell with water. Stop filling when water is visible.
13. Plug in the LED light and pump to your GFCI outlet. Your Fountainette will start running.
14. You may need to adjust the water flow. To do so, tilt or lift the finial enough to be able to reach the pump's control dial.
