

MASSARELLI'S®
MAKERS OF FINE STONE GARDEN ACCENTS

3996 - Fountainette - Roundstone

Fountain Information

- This fountain holds approximately 1 gallon of water.
- Two people are recommended for the installation of this fountain.
- A small fountain cover can be purchased separately for winterization.

Fountain Components

- #8860P - Roundstone Pedestal
- #3306S - Roundstone Shell
- #9670 - Roundstone Finial

Pump Kit P75EP Includes

- 1 - 40075 - 75 GPH Pump
- 1 - 9960 - 4" Piece of 3/8" Clear Tubing
- 1 - 9940 - Rubber Stopper

Tools Required

- Bubble Level
- Marker or Pen
- Tubing Cutter or Scissors

Set Up Instructions

1. Place the pedestal on a firm and level area where the Fountainette will be installed.
2. Find the pump and unravel the cord.
3. Feed the pump cord through the center of the shell by leaning the shell on it's side. As you stand the shell back upright, pull the cord through the center of the shell.
4. Find the Rubber Stopper and insert the cord by spreading the slit open.
5. Push the Rubber Stopper into the shell's PVC pipe until it is flush.
6. Find the tubing and attach by slipping it on to the pump fitting.
7. Find the finial and slide it over the tubing until the tubing is sticking out of the top of the finial. Place the finial carefully on the shell.
8. Mark the tubing where it is even with the top of the finial. Trim the the tubing a 1/2" shorter from your mark.
9. Slide the finial back onto the tubing and carefully place it on top of the shell.
10. Fill the shell with water. Stop filing when water is visible.
11. Plug in the pump to your GFCI outlet. Your Fountainette will start running.
12. You may need to adjust the water flow. To do so, tilt or lift the finial enough to be able to reach the pump's control dial.
