SET UP INSTRUCTIONS

3442 LARGE CHERUB ON SHELLS FOUNTAIN

THIS FOUNTAIN IS HEAVY. YOU WILL NEED HELP DURING SET UP.

Open the bag containing the pump kit **P29012**. In the kit you will find:

- | | |
|--|---|
| 1 – KING 400 (400 gallon per hour pump) | 1 - 28" long piece of 3/8" kink free tubing |
| 1 - 2 1/2" long piece of 1/2" clear tubing | 3 - 3/8" plastic tee |
| 1 - 5" long piece of 3/8" clear tubing | 1 - rubber stopper |

1. Find piece of 3/8" clear tubing 5" long and cut two pieces 2" long the remainder is a piece 1" long. Find the three 3/8" plastic tees. On the first tee attach a piece of 3/8" clear tubing 2" long on both end connections of the tee. On the middle connection slip on the piece of 3/8" clear tubing 1" long and on the same middle connection slip on the piece of 1/2" clear tubing 2 1/2" long. Attach the middle connections of the second and third 3/8" plastic tee onto the two end connections of the first tee. Find the piece of 3/8" kink free tubing 28" long and cut four pieces 7" long. Attach these four pieces of 3/8" kink free tubing 7" long to the four end connections of the second and third tees. Find the pump and attach it to the 1/2" clear tubing 2 1/2" long.

2. Place pedestal on a firm and level area where fountain will remain. Place a brick under one side of pedestal to help you retrieve the pump power cord. Place shell on pedestal.

3. Place pump in the pump house located in the center of shell. Run the plug end of the power cord down the PVC pipe located in the pump house and down thru the pedestal. Retrieve cord from under pedestal and place in groove in bottom of pedestal. Remove brick from under pedestal. Slip the rubber stopper onto the power cord with the smaller end facing away from the pump. Insert the rubber stopper snugly into the PVC pipe. Make sure the pump is seated on the bottom of the pump house. Adjust the position of the rubber stopper on the power cord if necessary.

4. Position shell on pedestal and level. To level shell, place the level on the top rim of the pump house in the center of the shell. Level in (2) Two directions left to right and front to back. Shim if needed.

5. Find statue. On a padded surface lay the statue on its back. On the bottom of the statue you will see four copper pipes. Clean any excess concrete and or tape from these copper pipes.

6. Look inside the pump house. There you will find four pieces of 3/8" kink free tubing 7" long that you will connect to the statue. Place a piece of padding on one edge of the pump house and onto the shell. Place the statue on pump house. Have one person tilt and hold statue and another person connects the four pieces of 3/8" kink free tubing to the copper connection located in the bottom of the statue. Position the statue on shell. Remove padding.

7. Fill shell with tap water and plug pump into a 110VAC GFCI protected outlet.
