

MASSARELLI'S®

MAKERS OF FINE STONE GARDEN ACCENTS

SET UP INSTRUCTIONS

3636 LION'S SQUARE FOUNTAIN

1. Open the bag containing the pump kit **P29015**. In the kit you will find:

1 - KING 400 (400 gallons per hour pump)	3 - 1/2" plastic tee
1 - 45" long piece of 1/2" kink free tubing	1 - rubber stopper

2. Find the piece of 1/2" kink free tubing that is 45" long and cut four pieces of this tubing 8" long and three pieces 4" long.
3. Find the three 1/2" plastic tee. On the first 1/2" plastic tee attach the three pieces of 1/2" kink free tubing 4" long onto the two end connections and onto the middle connection. Attach the middle connection of the second and third 1/2" plastic tee to the two end connections of the first 1/2" plastic tee. On the four end connections of the second and third 1/2" plastic tee attach the four pieces on 1/2" kink free tubing 8" long. This will be the tubing assembly to run the fountain.
4. Find the pump and attach the piece of 1/2" kink free tubing 4" long that is connected to the middle connection of the first 1/2" plastic tee to the outlet side of the pump.
5. Place the pedestal on a firm and level area where the fountain will remain. Place the octagon shell onto the pedestal and center.
6. Place the pump assembly in the pump house located in the center of octagon shell. Run the plug end of the power cord down the PVC pipe located in the pump house and down thru the pedestal. Retrieve cord from under the pedestal and place in the access hole in the base of the pedestal. Slip the rubber stopper onto the power cord about 12" from the pump with the smaller end facing away from the pump. Insert the rubber stopper snugly into the PVC pipe. Make sure the pump is seated on the bottom of the pump house. Adjust the position of the rubber stopper on the power cord if necessary. Position the shell centered on the pedestal.
7. Find the lion center column. On a padded surface lay the lion center column on its side. On the bottom of the column you will see four copper pipes. Clean any excess concrete or tape from these copper pipes. Place padding on one side of the pumphouse. Using two people, carefully place the lion center column on the padded side of the pumphouse. One person will carefully tilt the column to one side, the second person can attach the four pieces of 1/2" kink free tubing to the four copper pipes.
8. Find the column top and place on top of the lion center column.
9. Find the drain plug and insert snugly into the drain insert located in the octagon shell. Fill the octagon shell with tap water and plug pump into a 110VAC GFCI protected outlet.
