

## SET UP INSTRUCTIONS

### 3706 32" CENTO URN ON CLASSIC POOL FOUNTAIN

Open bag containing the pump kit **P46007**. In the kit you will find:

- |                                       |                    |
|---------------------------------------|--------------------|
| 1 - 40460 (460 gallon per hour pump)  | 1 – putty tape     |
| 1 - 36" long piece of 3/4" PVC pipe   | 1 – rubber stopper |
| 1 – 3/4" X 1/2" reducing male adapter |                    |

1. Place pool on a firm and level area where fountain will remain. Place a brick under one side of pool to help you retrieve the pump power cord.
2. Find the pump and the rubber stopper. Place the pump in the pumphouse located in the center of pool. Run the plug end of the power cord down the PVC pipe located in the pumphouse. Retrieve cord from under pool and place in groove in bottom of pool. Slip the rubber stopper onto the power cord 12" from the body of the pump with the smaller end facing away from the pump. Insert the rubber stopper snugly into the PVC pipe. Make sure the pump is seated on the bottom of the pumphouse. Adjust the position of the rubber stopper on the power cord if necessary. Remove brick from under pool and level.
3. To level pool, place the level on the top rim of the pump house in the center of the pool. Level in (2) Two directions left to right and front to back. **Shim if needed.**
4. Place a piece of padding on one side of the pumphouse. Find the 32" cento urn. Remove any tape or excess concrete from both ends of the PVC pipe located in center cavity of the urn. Place the urn on the padding side of the pumphouse. Find the piece of 3/4" PVC pipe 36" long. Carefully tilt the urn and insert the plain end of the 3/4" PVC pipe into the PVC pipe that is in the base of the urn. Line up the threaded outlet of the pump with the threaded adapter that is on the end of the 3/4" PVC pipe. **Carefully** screw the threaded adapter into the threaded outlet of the pump **hand tight**. Raise the urn while **carefully** guiding the pump into the pumphouse. Position the urn on top of the pumphouse and level. Remove the padding. To level, place level on top rim of the 32" cento urn. Level in (2) Two directions left to right and front to back. **Shim as needed.**
5. Find the piece of putty tape. Remove the backing from the putty tape. Apply the putty tape around the 3/4" PVC pipe and down into the PVC in the center cavity of the urn where it passes through. Keep the 3/4" PVC pipe in the center of the PVC pipe while you apply the putty tape all the way around. **You want to create watertight seal so use all of the putty tape.**
6. Find the drain plug and insert snugly into the drain insert located in the fountain pool. Remove any tape and or dirt from the drain insert before you insert the drain plugs.
7. Fill the urn and the fountain pool with water. Plug the pump into a 110VAC GFCI protected outlet.
