

SET UP INSTRUCTIONS

3712 PAGNANI FLEUR DE LIS FOUNTAIN

Open bag containing the pump kit **P22508**. In the kit you will find:

- | | |
|--|----------------------------------|
| 1 – 40225 (225 gallon per hour pump) | 1 – 2-hole rubber stopper |
| 1 - 3" long piece of 3/4" clear tubing | 1 – underwater light 48LED white |

1. Find the pump, the LED light kit and the 2-hole rubber stopper.
The LED light kit is a two-piece unit. One piece is the fountain nozzle and the second piece is the LED light ring. The fountain nozzle will attach to the pump and the LED light ring will mount on top and around the fountain nozzle.
2. Slip the 2-hole rubber stopper onto the power cord of the pump and the power cord of the LED light ring. Position the 2-hole rubber stopper about 8" from the body of the pump and about 12" from the LED light ring.
3. Place the fountain bowl on a firm and level area where the fountain will remain. Run the plug end of both power cords down the PVC pipe and out the bottom of the fountain bowl. Retrieve both power cords from under the fountain bowl and place both power cords in the groove in the bottom of the fountain bowl. Pull the remainder of both power cords out from the bottom of the fountain bowl. Insert the 2-hole rubber stopper snugly into the PVC pipe.
4. Level the fountain bowl. To level, place level on the top rim of the fountain bowl. Level front to back and left to right.
5. Find the 3/4" clear tubing 3" long and attach one end to the outlet side of the pump. Insert the fountain nozzle into the opposite end of the 3/4" clear tubing. Place the pump in the center of the bowl with the fountain nozzle facing up. Position the LED light ring around the fountain nozzle
6. Find the pump house and **CAREFULLY** place it around the pump guiding the LED light ring up through the hole in the center of the pump house. Position the pump house centered inside the fountain bowl.
7. Find the bird finial and place it onto the pump house **CAREFULLY** guiding the LED light ring up through the hole in the center of the bird finial. Position the bird finial centered on the pump house.
8. Find the drain plug and insert snugly into the drain insert located in the fountain bowl. Remove any tape and or dirt from inside the drain insert before you insert the drain plug.
9. Connect the power cord on the LED light ring to the transformer. Fill the fountain bowl with 8" of water. Plug, both the pump and the LED light transformer into a 110VAC GFCI protected outlet.
